

IT Onboarding Guide

Company: Northstar Technologies (fictional)

1. Account Setup

New employees receive a company email account and access to the employee portal.

Initial account credentials are provided through the company's approved secure process.

Employees must change temporary passwords when prompted.

2. Laptop

IT provides eligible employees with a company laptop on or before the first working day.

Employees should inspect the laptop and report hardware problems to IT.

Company laptops should be used primarily for authorized business activities.

3. Required Software

Employees receive access to the applications required for their role.

Software installation requests should be submitted through the IT service portal.

Employees should not install unapproved software on company devices.

4. Security

Employees must use multi-factor authentication when required.

Employees must not share passwords or authentication codes with other people.

Suspicious emails or security incidents should be reported to the IT service desk immediately.

Document purpose: This fictional policy is intentionally simple and structured for testing an employee-onboarding RAG application.
