

Payroll Procedures

Company: Northstar Technologies (fictional)

1. Pay Schedule

Employees are paid on the last working day of each month.

If the normal payday falls on a company holiday, payment is made on the preceding working day.

2. Bank Details

Employees should enter their bank account information in the HR portal before the monthly payroll cutoff.

Employees are responsible for keeping their bank information accurate and current.

Changes submitted after the payroll cutoff may take effect in the following pay cycle.

3. Payslips

Electronic payslips are available through the employee portal after payroll is processed.

Employees should review their payslip and contact HR if they notice an unexpected difference.

4. Payroll Questions

Employees should contact the HR payroll team for questions about salary payments, deductions, or payslips.

Employees should include their employee ID and the relevant pay period when submitting a payroll question.

Document purpose: This fictional policy is intentionally simple and structured for testing an employee-onboarding RAG application.
